

GHC Demo Assignment

CSC 110 - Fall 2025

Muhammad Ahmad Adil

2025-10-12

Homework

```
ggplot(mpg, aes(x = displ, y = hwy)) +  
  geom_point(color = "blue") +  
  labs(  
    title = "Engine Displacement vs. Highway Fuel Efficiency",  
    x = "Engine Size (Liters)",  
    y = "Highway MPG"  
  )
```

My Other Classes

- Data Science & Society
- Intro to Accounting
- American Economic History
- Medieval Philosophy

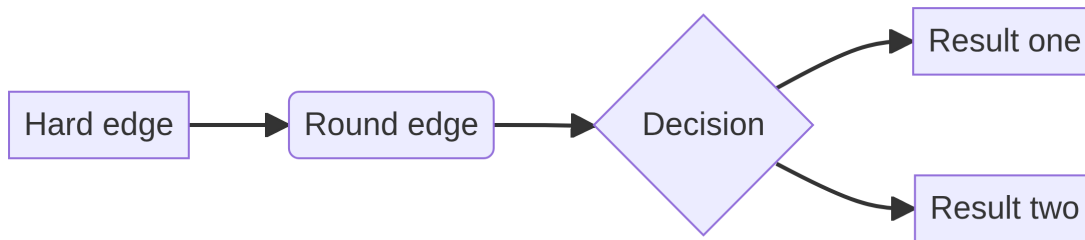

My Top 3 Favorite Movies / TV Shows

1. Brookly Nine Nine
2. The Dark Knight
3. Prison Break

Here's a small footnote for fun.¹

¹This is a Markdown footnote example.

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Homework

< page break >

Reflection

“Four score and seven years ago our fathers brought forth on this continent, a new nation, conceived in Liberty, and dedicated to the proposition that all men are created equal.”

Note

Note that I am using three types of callouts

Tip

Right now I am using tip

Important

Now I am trying to make important collapsible

Reflection

1. Using Quarto themes

One technique I found really helpful was learning how to change Quarto **themes**. In the final project I can use this to add a unique and good looking theme to my liking which will go with our topic and overall project.

2. Displaying Equations

I also learned how to write **mathematical equations** directly inside Markdown using `$$`. This feature helps me clearly show any formulas and steps I might use in the final project showing any calculations I do using the data.

3. Callout Blocks

Finally, I enjoyed experimenting with **callout blocks** which let me highlight key notes, tips, and important messages in a visually appealing way. They are perfect for separating important reminders or summaries from all the data and analysis I have in the final project. The collapsible option is especially useful when presenting long explanations that I want to hide otherwise.
